

Media Queries

On the right is a screenshot of a website at three different screen sizes (less than 600px wide, between 600 - 900px wide, and larger than 900px wide).

The starter code has all the HTML for the page, but a lot of the CSS is missing. Your job is to complete the CSS to match the styles below. You will need min media queries at 600px and 900px
